

Akın DEMİR

Computer Engineer

CAREER OBJECTIVE

Computer Engineering graduate with a passion for Android Development. Seeking to join a dynamic team and utilize my skills for the company to achieve its goals.

EDUCATION

- Android Developer Nanodegree, Udacity (Grad: August 2018)
- Computer Engineering, Faculty of Computer and Information Science, Sakarya University (Grad: June 2018)

PROJECTS

Tourlines App (July 2018) – Udacity Android Nanodegree [Android]

- As part of Android Developer Nanodegree Capstone Project, I have developed Tourlines App which uses Turkish Airlines API.
- Tourlines allows a user to search for airports and available flights of Turkish Airlines and AnadoluJet.

Yummio App (June 2018) – Udacity Android Nanodegree [Android]

- A cooking app which displays recipes from provided network resource and allows user to navigate between individual recipes and recipe steps.
- App uses Master Detail Flow to display recipe steps and navigation between them. It has a companion homescreen widget that displays ingredient list for latest selected recipe.

Popvie App (May 2018) – Udacity Android Nanodegree [Android]

- Popvie, allows users to discover the most popular, top rated, now playing(in theaters) and upcoming movies.
- User can create Favorites Lists, Watchlist, Video Lists and can watch Trailers and read Reviews of movies.

Trendcaption App (November 2016) – EXEDRA E-Business Solutions [Android]

- A Twitter application, pulling trending tweet images which you can add caption and share on Twitter. Built as an Android application; consuming Twitter API.

DTS (Dental Tracking System) (May 2016) – Sakarya University (Final Project) [Web]

- A web project for Dentists to track patients' dental operations and schedule appointments. Patients can also see their appointments and list of operations they had.
- Built with PHP, HTML, CSS, JavaScript, jQuery, MySQL.
- Won "Best Poster Design" Award (Certificate of Appreciation).

Movie Information System (June 2015) – Sakarya University [Web]

- A web project built with ASP .NET MVC5, Entity Framework, SQL Server, HTML, CSS, JavaScript, Bootstrap.
- Provides information about movies such as ratings, directors, writers, stars etc. and members can have favourite movies, actors/actress lists and post comments about them.

Game of Euler (May 2015) – Sakarya University [Web]

- A gamification project to gamify Euler Algorithm built with HTML5, CSS3, JavaScript and jQuery Ajax.

EXPERIENCE

Exedra E-Business Solutions (July 2016 – August 2016) – Internship

- Attended seminars led by experienced business people from IT and related fields focuses on popular topics like IoT, Big Data, Machine Learning, Entrepreneurship and more.
- Joined Java Project Team and developed Capslt a Java Web Project and Trendcaption an Android Project.
